Yellow perch	Hornpout (bullhead)
Chain pickerel	Pumpkinseed sunfish
Minnnows	Black crappie
Golden shiner	

L3928A

### Physical Characteristics

Area - 30 acres

Temperatures:

Maximum depth - 9 feet

Surface - 81°F  
7 feet - 78°F

Principal fisheries: Largemouth bass, chain pickerel

Nearby North Shapleigh Pond was stocked with largemouth bass fingerlings in 1960. A short thoroughfare connects Hansen and North Shapleigh ponds, and has enabled largemouth bass to also establish in Hansen Pond.

Black crappie were first confirmed in the drainage in 1970, when an illegally established population was discovered in Balch Lake. Crappies have since established elsewhere in the drainage, including North Shapleigh (confirmed 1978). Because Hansen Pond and North Shapleigh Pond are connected it is probable that crappies are also present in Hansen Pond.

Angler access is restricted to permissive trespass and there is a need to develop public access to this water.
